

C. R. Biologies 336 (2013) 73–81)

La flore probable : un mode d'expression des gradients écologiques en France. Probable flora: An expression mean of ecological gradients in France.

Emmanuel Garbolino, Patrice De Ruffray, Henry Brisse, Gilles Grandjouan

Wrong formula (edited)

$$DIS = \sum_1^n \left[|V_{relevé} - V_{sophy}| \times ((V_{relevé} + V_{sophy}) - (V_{relevé} - V_{sophy})) \right] \quad (4)$$

Corrected version:

$$DIS = \sum_1^n \left[|V_{relevé} - V_{sophy}| \times ((V_{relevé} + V_{sophy}) - (V_{relevé} \times V_{sophy})) \right] \quad (4)$$
